

Microsoft Dynamics 365 Business Central

BBS Compensation management for Customers and Vendors

This application provides compensation management for customers and vendors, for the Microsoft Dynamics 365 Business Central application.

After implementation of this application, Microsoft Dynamics 365 Business Central users can easily manage customers and vendors, that are linked via contact, check compensation proposals with amounts (balance between customer-vendor for the same contact company), use reports and documents that can be sent to the company, and post the compensation transaction, including customer and vendor apply entries procedure.

Benefits of using the extension:

- The BBS Compensation management is prepared as an application extension that can be easily installed and used for every market where the client has the same company in two roles, customer and vendor, including the scenario where three companies want to close the mutual balance (so-called cessions)
- During the posting procedure of the compensation or cession, customer and vendor entries are applied
- This application extension is secure and reliable
